DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art discloses an ac generator for a vehicle having a rotor, a shaft, a stator having three-phase stator windings, a frame for supporting the stator and rotor, a rectifier unit, diodes, lead wires and input terminals. However, the prior art fails to show, in combination with the invention, a rectifier unit disposed outside the frame and having a plurality of input terminals connected to output lead wires, each of the input terminals including columnar terminal member for holding two output lead wires each of which is connected to different one of diodes wherein a columnar member is disposed in each lead-wire hole and a first one of the columnar terminal members holds two output lead wires extended from the first stator winding, second one of columnar terminal members holds two output lead wires extended from the second stator winding and the remainder of the columnar terminal member holds two output lead wires respectively extended from first and second stator windings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
